

PRINTREX 980

by TRANSACT

Boasting a blazing plot speed of 8 inches per second, the Printrex 980 is the fastest full color inkjet printer/plotter available for plotting continuous logs.

WELL-LOGGING COLOR. MIND-BOGGLING SPEED.

- Fastest color inkjet printer in the industry
- Large capacity tanks give the capability to print thousands of pages without changing ink supply
- Print quality enhancement features Depth Line Accuracy, Stitching Stream Technology and Automatic Image Shifter
- Automatic head cleaning cycle periodically cleans the print nozzle to ensure continuous high-quality log plots
- No limitation on plot length

FIELD PROVEN TECHNOLOGY

The Printrex 980 is based on continuous innovation, spanning several generations of successful products.

QUICK, EASY CHANGE OF INK TANKS

Four separate ink tanks — cyan, yellow, magenta, and black — permit the easy exchange of each individual color. The large capacity tanks (240 ml each) give the capability to print 1,000s of pages without changing ink supply. An ink low indicator advises the operator to replace the appropriate tank to avoid running out of ink during a plot.

PRINT QUALITY ENHANCEMENT FEATURES

DLA – Depth Line Accuracy – The 980 automatically measures time between forms marks and adjusts the plot length to ensure accuracy of scale

SST – Stitching Stream Technology – If the printer is temporarily starved of data, it will pause but then resume when data is received without any gaps in the plot.

AIS – Automatic Image Shifter – Shifts the image position on the paper to avoid always using the same nozzles for the vertical lines and thereby extending print head life.

AUTOMATIC HEAD CLEANING CYCLE

The 980 periodically cleans the print nozzles to ensure continuous high quality log prints.
